

Instructions for Completion and Submittal of Waste Profile Sheet:

- One form must be completed for each industrial waste stream. Multiple industrial waste streams may be shipped together, however any special handling requirements will apply to the entire load.
- Generator Information: The generator must provide the name, mailing address, the location of the waste being generated, including the street address, building number, as well as contact information.
- Waste Information: If this is a renewal of your current waste stream, mark “Yes” and enter your current approval number as “Previous Number”. If this is a new waste stream or has not been disposed of at South Side Landfill before, mark “No”.
- List the name of the waste.
- Please provide a description of the process and raw materials that are used in generating the waste. Describe the process and a list of all the raw materials or chemicals used in the processing of the waste. If the waste is the result of a clean up from a spill or release of a material, provide a complete description of the process that generated the material and any site assessment/investigations, if performed.
- If the waste is exempt or excluded by 40 CFR 261.3(c) – (h), or 261.4, explain on a separate page with specific citations.
- Carefully review 40 CFR 261.31 (F List), 261.32 (K List), and 261.33 (P and U List) to verify that your waste, process, or ingredients are not on these lists.
- Amount of Waste: List the estimated **annual** disposal volume in cu/yds or tons.
- Representative Sampling Certification: It is the generator’s responsibility to ensure that proper sampling protocols are used, as found in 40 CFR 261 Appendix 1 or in Chapter 9 and 10 of EPA Publication SW 846 – *Test Methods for Evaluating Solid Waste*. The landfill may request the documentation used in the waste determination for any waste prior to or after disposal. If sampling was used in the waste determination the following documentation must be provided upon request: a sampling and analysis plan, appropriate QA/QC documentation, and analytical results.
- The generator must receive written approval from the landfill prior to disposal. Along with approval for the waste, an approval number will be issued for that particular waste stream. The approval number must appear on the **Non-Hazardous Waste Shipping Form** that must accompany each load. The approval is good for up to five (5) years on Industrial Process Wastes or ongoing Pollution Control Wastes, but will be reviewed if the process or raw materials in the process change. Waste determination documentation will be requested at the end of five (5) year period or if the process or the raw materials change. Pollution Control Wastes generated by remediation or other clean up type work are typically approved only for a given project.
- Please return the Waste Profile and any supporting documents to South Side Landfill, Inc., Attn: Curt Publow, 2561 Kentucky Ave., Indianapolis, IN 46221. Or you may fax to (317) 247-7034. You do not need to return the instruction pages, please keep for reference.
- Completing all information including the attachment will assist in expediting the approval process.
- The following page includes some references that may be useful during a waste determination and characterization.

If you have any questions please contact our office at (317) 247-6808.

Generator Responsibilities for Waste Information

329 IAC 10-7.2-1 Generator responsibilities for waste information

Authority: IC 13-14-8-7; IC 13-15-2; IC 13-19-3-1

Affected: IC 13-12; IC 13-14-1-4; IC 13-14-2-7; IC 13-19; IC 13-30-2-1

Sec. 1. (a) A person who generates a solid waste shall carry out the hazardous waste determination required by 40 CFR 262.11, incorporated by reference in 329 IAC 3.1-7.

(b) A person who generates a nonhazardous solid waste and disposes of it in a solid waste land disposal facility regulated under this article shall determine if any of the following are present in the waste:

(1) Fugitive dust regulated under the rules of the air pollution control board at 326 IAC 6-4, or fugitive particulate matter regulated under the rules of the air pollution control board at 326 IAC 6-5.

(2) Heat, or the capability of generating heat, regulated under 329 IAC 10-8.2-3.

(3) Regulated asbestos-containing material regulated under 329 IAC 10-8.2-4.

(4) Polychlorinated biphenyls regulated under 329 IAC 4.1 or this article.

(5) Pesticides regulated under this article or 329 IAC 3.1.

(6) Infectious waste regulated under the rules of the Indiana state department of health at 410 IAC 1-3.

(7) Liquid waste regulated under 329 IAC 10-20-27.

(8) Other materials prohibited from disposal under 329 IAC 10-9-2.

(c) Nothing in this rule limits the authority of the commissioner to require any information necessary to secure compliance with, or grant an approval under, this article. (*Solid Waste Management Board; 329 IAC 10-7.2-1*)

Pesticides and Wastes Containing Pesticides

329 IAC 10-8.2-6 Waste pesticides or wastes contaminated with pesticides

Authority: IC 13-14-8-7; IC 13-15-2; IC 13-19-3-1

Affected: IC 13-11-2-155; IC 13-12; IC 13-19; IC 13-20-7-6; IC 15-3-3.5-34

Sec. 6. Waste pesticides or wastes contaminated with pesticides must be disposed of in accordance with: (1) the label required by 40 CFR 156.10(a), revised as of February 23, 1998, available from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954, (202) 783-3238; and (2) IC 15-3-3.5-34.

(*Solid Waste Management Board; 329 IAC 10-8.2-6*)

Infectious Wastes

329 IAC 10-2-96 "Infectious waste" defined

Authority: IC 13-14-8-7; IC 13-15-2-1; IC 13-19-3-1

Affected: IC 13-30-2; IC 36-9-3

Sec. 96. "Infectious waste" has the meaning set forth in the rules of the state department of health at 410 IAC 1-3-10, as supported by the ancillary definitions of 410 IAC 1-3. (*Solid Waste Management Board; 329 IAC 10-2-96; filed Mar 14, 1996*)

Generator Knowledge

329 IAC 10-2-78.1 "Generator knowledge" defined

Authority: IC 13-14-8-7; IC 13-15-2; IC 13-19-3

Affected: IC 13-11-2; IC 13-18-1; IC 13-18-20; IC 25-31; IC 36-9-30

Sec. 78.1. "Generator knowledge" means the relevant, accurate, and reliable information available to or developed by the generator about a waste that allows a person to determine the correct regulatory status of that waste. This information may include, but is not limited to, the following categories of information:

(1) Information provided by the manufacturer or supplier of the materials used in the process.

(2) Information provided in reference materials.

(3) Information describing the process that generates the waste.

(4) Information describing the materials used in the process that generates the waste.

(5) Information describing principles of science, including chemistry and physics, applied to the raw materials and process used.

(6) Information developed through prior testing of the waste.

(*Solid Waste Management Board; 329 IAC 10-2-78.1*)

Date Submitted:

Generator's Waste Approval Application

Do you have an account with South Side Landfill or one of our affiliates? Yes No If not, supply billing info on Page 5.

A. Generator Information:

Generator Name	<input type="text"/>	SIC Code	<input type="text"/>
Mailing Address	<input type="text"/>		
City	<input type="text"/>	State	<input type="text"/>
		Zip Code	<input type="text"/>
Generator Site Address	<input type="text"/>		
City	<input type="text"/>	State	<input type="text"/>
Contact Name and Title	<input type="text"/>		
Contact Phone	<input type="text"/>	Contact Fax	<input type="text"/>
Contact e-mail	<input type="text"/>		

B. Waste Information:

Is this a renewal? Yes No Previous Number Name of Waste Description of Process
Generating Waste and Raw
Materials Used (attach a
separate sheet if necessary):

Is this waste exempt or excluded at 40 CFR 261.3(c)-(h) or 261.4? <input type="radio"/> Yes <input type="radio"/> No	Is the waste, the process, or any ingredient of the process listed at 40 CFR 261.31 (F List), 261.32 (K List), or 261.33 (P,U Lists)? <input type="radio"/> Yes <input type="radio"/> No
Does this waste contain Polychlorinated Biphenyls (PCB's)? <input type="radio"/> Yes <input type="radio"/> No	Is this a regulated Medical or Infectious waste as defined in Federal or State rules? <input type="radio"/> Yes <input type="radio"/> No
Is this a radioactive waste? <input type="radio"/> Yes <input type="radio"/> No	Was this waste generated at a Federal Superfund Clean Up site? <input type="radio"/> Yes <input type="radio"/> No
Physical State of Waste: <input type="radio"/> Solid <input type="radio"/> Powder <input type="radio"/> Semi-solid <input type="radio"/> Liquid	Method of Shipment: <input type="radio"/> Bulk <input type="radio"/> Tanker <input type="radio"/> Drum <input type="radio"/> Other
Estimated ANNUAL Qty: <input type="radio"/> Cubic Yards <input type="text"/> <input type="radio"/> Tons <input type="text"/>	Frequency of Shipment: <input type="radio"/> Daily <input type="radio"/> Monthly <input type="radio"/> Weekly <input type="radio"/> One Time <input type="radio"/> Other (Specify): <input type="text"/>

C. Representative Sample Certification

 No Sample TakenWas the representative sample collected in accordance with 40 CFR 261 Appendix I or equivalent? Yes No Sample Type: Composite GrabSample Date: Sampler's Employer: Sampler's Name: Sampler's Signature:

Generator's Waste Approval Application

D. Waste Characteristics **It is the generator's responsibility to determine if a waste is hazardous!**

1. Ignitibility

Is this waste ignitable, as defined at 40 CFR 261.21? Yes No

Is this waste a compressed gas, as defined at 40 CFR 261.21(3)? Yes No

Is this waste an oxidizer, as defined at 40 CFR 261.21(4)? Yes No

2. Corrosivity

Is this waste corrosive, as defined at 40 CFR 261.22? Yes No

3. Reactivity

Is this waste normally unstable and readily undergo violent change without detonation? Yes No

Does this waste react violently with water? Yes No

Does this waste form potentially explosive mixtures with water? Yes No

Does this waste meet the definition of reactive at 40 CFR 261.23? Yes No

Does this waste contain >250 ppm of cyanide? Yes No or >500 ppm of sulfides? Yes No

Is this waste a forbidden explosive, or a class A or B explosive (40 CFR 261.23(a)(8))? Yes No

4. Toxicity

Does TCLP analysis of this waste exceed any of the toxic limits at 40 CFR 261.24? Yes No

5. Special Handling

Is this waste subject to any of these special handling requirements? (Check all that apply)

Generate Fugitive Dust - 329 IAC 10-8.2-2

Regulated as a PCB Waste - 329 IAC 4.1

Hot or Capable of Generating Heat - 329 IAC 10-8.2-3

Pesticides/Pesticide Wastes - 329 IAC 10-8.2-6

Regulated Asbestos Containing Material - 329 IAC 10-8.2-4

Other (Please Explain Below)

E. Documentation

Is the documentation used to make the waste determination available for review by South Side Landfill and IDEM, if requested? Yes No

If sampling was used in the waste determination, the following must be made available upon request: Sampling and Analysis Plan, Appropriate QA/QC, and Analytical Results.

F. Generator Certification

The waste described in this Waste Profile Sheet, and all supporting documentation used in the waste verification, verifies that the described waste is one of the following types of waste: an Industrial Process Waste as defined in 329 IAC 10-2-95, a Pollution Control Waste as defined at 329 IAC 10-2-137, or a Regulated Asbestos Containing Material as defined at 329 IAC 10-2-152.5. The waste is not a hazardous waste as described in 40 CFR 261 or 329 IAC 3.1, nor is it any other type of unauthorized waste.

I certify that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge, true, accurate, and complete. I further certify that I am authorized to submit this information.
